"Last used / recently generated" on the main hub. Surface the right tool without hunting.

02 — Groundbreaking Features

1.
Compliance Checker

AI reads generated captions and flags non-compliant copy against ASA/CAP codes before anything goes out. No tool does this specifically for UK aesthetics.

2.
Client Self-Service Portal

Each client logs in, views scheduled content, requests posts, approves drafts. Social media manager sets the guardrails.

3.
UGC-to-Content Pipeline

Paste a Google review or Instagram comment. AI generates a branded testimonial graphic, story, and caption ready to post.

4.
Treatment Menu to Calendar

Upload a treatment menu. AI generates a full month of educational carousel content — one post per treatment.

5.
WhatsApp App Delivery

"Send to WhatsApp" on approval batches, calendars, reports. Replaces the copy-paste-link workflow happening outside the tool.

6.
Tre
nd
Pul
se

Weekly AI brief: trending sounds, formats, hashtags in UK aesthetics. One-click "build this" pre-loads the right tool.

7.
Bef

o

Two images in — composited side-by-side with compliant framing, branded overlay, disclaimer text, and a ready-to-use caption.

03 — Outside the Box

1. We bsit e U RL to C ont ent Stra teg y

Paste clinic URL. AI reads it and generates a complete preset, 30 days of content, and a posting schedule. Onboard a new client in four minutes.

2. Con tent Aut opil ot

Flag a client as autopilot. Every two weeks the system drafts 14 posts. You review, approve with one tap, schedule. You become an editor, not a producer.

3. Ani mat ed Bef ore/ Afte r Sli der Vid eo

Animated reveal — slider sweeps across, branded overlay fades in. The highest save-rate format in aesthetics. Nobody has automated this.

4. Mo od Boa rd to B ran d Pr ese nt

Paste a Pinterest URL or drop 6 images. AI extracts colour palette, infers typography feel, builds a complete client preset.

5. Ree l Sc ript Gen erat or with Tel epr om pter

Full scripts: hook, value, CTA. Built-in teleprompter — words scroll at reading pace. Practitioner films directly from the app.

6.

Record 60 seconds of the practitioner voice. Generate natural-sounding voiceovers for reels without re-recording.

04 — Platform & Agency Play

1. Whi te-L abe l the Cyb erS uite

Social media managers rebrand the tool with their own logo and domain and resell access to clinics. Turns a tool into a software business.

2. Pitc h D eck Gen erat or

Enter a clinic handle. AI audits their social presence, benchmarks against competitors, builds a 12-slide new business pitch deck in 8 minutes.

3. Liv e E ven t M ode

Drop a photo in during an open day — branded, captioned, and posted within 90 seconds while the event is still happening.

4. Con tent Arc hiv e as Bus ine ss Ass et

Every post ever created — searchable, filterable by client, treatment, performance, and season. Institutional knowledge in the tool.

5. Wai ting Ro om Scr een Mo de

Export content as a looping clinic display formatted for a waiting room TV or tablet.

6.
Client Annotation Feedback

In the approval portal, clients circle things and drop pins. Precise visual feedback without a phone call.

7.
Monthly Strategic Report — Auto-Generated

First of the month: every client gets a PDF — top posts, engagement breakdown, recommended focus. Generated in seconds.

8.
Content Performance Replay

Visual month-in-review: posts in order, engagement peaks highlighted. Tangible proof of work.

9.
Micro-Learning Series Engine

"Did you know?" posts auto-generated weekly. Positions the clinic as an authority with zero effort from the practitioner.

10.
Content Licensing Marketplace

Social media managers list best-performing templates for others to buy. Revenue share with the platform.

11.
